Education

Bharati Vidyapeeth College of Engineering, Kolhapur

2024 - Present

B.Tech in Computer Science & Engineering

Bharati Vidyapeeth College of Engineering (Polytechnic), Kolhapur

July 2021 - June 2024

Diploma in Computer Engineering

Industrial Training / Academic Training

P Cube Technologies

June 2023 - July 2023

Web Development Training

Kolhapur, Maharashtra

- Completed an academic industrial training program as part of my diploma curriculum, focused on web development fundamentals
- Built and maintained basic web pages using **HTML, CSS, and JavaScript**
- Assisted in implementing frontend features and resolving UI-level issues under guidance
- Gained exposure to real-world development workflows, debugging practices, and task-based collaboration within a web development team
- Strengthened practical understanding of web technologies and development best practices

Projects

StreakForge: Full-Stack Habit Tracking Platform

February 2026

- Built a full-stack habit tracking web application using **React (TypeScript)** and **Flask**, enabling users to create, log, and manage daily habits with automated streak tracking
- Designed and developed **RESTful APIs** using Flask, SQLAlchemy, and **PostgreSQL**, implementing unique constraints to prevent duplicate daily logs
- Managed database schema changes using **Flask-Migrate (Alembic)** instead of manual table creation, ensuring production-ready database version control
- Deployed frontend on **Vercel** and backend with PostgreSQL database on **Render**, configuring environment variables and production build pipelines

Valora: An Interview Preparation Platform

January 2026

- Created an AI-driven mock interview platform using **React.js** and **Node.js** that leverages the **Gemini API** to provide real-time behavioral and technical interview simulations
- Integrated **Web Speech API** and natural language processing to deliver instant feedback on user responses, including performance analytics, confidence scoring, and personalized improvement insights

ShopGenius: AI-Powered E-Commerce Shopping Assistant

May 2025

- Developed an AI-based chatbot platform to enable intelligent product search and recommendations
- Built a responsive frontend using **React** and backend REST APIs using **Flask**
- Implemented secure authentication and integrated a mock product database

EIGA: Movies, Series and Anime Rating Website

April 2025

- Created a responsive platform for discovering movies, series, and anime
- Integrated **The Movie Database (TMDb) API** to retrieve real-time content, ratings, and metadata
- Added pagination and advanced search functionality using **Firebase**

Eco-Cart: Sustainable E-Commerce Platform

April 2025

- Designed an eco-friendly shopping platform with sustainability-based product ratings
- Built using **React** with modern, user-friendly interface to promote green lifestyle choices

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Flask, Bootstrap, SQLAlchemy

Databases: MySQL, PostgreSQL, Firebase

Tools & Concepts: Git, GitHub, REST APIs, Agile Methodologies, Responsive Design, Debugging, Vercel, Render

Key Achievements

- Improved database performance by 30% through effective query optimization
- Developed more than 15 production-ready features for a live web application
- Led a project team to deliver a solution 10 days ahead of the planned schedule
